

How much solar capacity does CPS Energy offer?

CPS Energy offers over 500 MW of solar capacity. There are 6 solar programs, including the Solar Rebate program with 18.8K customers and 599 rooftops, and the Roofless Solar program with 433 panel owners. As a leader in solar, CPS Energy continues to create innovative opportunities for customers, with 160 MW installed in their service area.

Does CPS Energy offer a rebate for customer-owned solar systems?

CPS Energy provides a rebate for customer-owned solar systems as part of its Save for Tomorrow Energy Plan (STEP).

How long does the solar interconnection process take with CPS Energy?

CPS Energy's solar interconnection process can take as little as 2 weeks, and as long as 3 months. Despite having a low buyback rate, San Antonio homeowners can still save hundreds on their monthly electric bills under CPS Energy's net billing program.

What is the name of CPS Energy's solar buyback program?

Yes, CPS Energy offers a buyback program called net billing for their residential customers who install solar panels. Despite having a low buyback rate, San Antonio homeowners can still save hundreds on their monthly electric bills under this program.

How can I save money on my CPS Energy bill?

You can save money on your CPS Energy bill by switching to solar. Despite their low solar buyback rate, under CPS's net billing program, electricity produced by your solar panels will cover the cost of electricity you use in your home.

What is the net billing program offered by CPS Energy?

Under CPS's net billing program, electricity produced by your solar panels will cover the cost of electricity you use in your home. This means that any excess solar energy you produce can be used to offset your electricity bill.
