

Where is Dau Tieng solar power complex located?

The inauguration of the Dau Tieng Solar Power Complex, a joint venture between Vietnamese construction firm Xuan Cau and Thai conglomerate B.Grimm, took place Saturday in Tan Chau District, Tay Ninh Province, around 100 km (62 miles) from Ho Chi Minh City.

What is the largest solar project in Southeast Asia?

The Dau Tieng solar power complex is built on a manmade reservoir in Vietnam and has a capacity of 420 MW, making it the largest solar project in Southeast Asia. The Dau Tieng solar power complex has been inaugurated in Vietnam, and with a designated solar capacity of 420 MW, the largest solar project in Southeast Asia.

How much does Dau Tieng Lake cost?

The \$391 million complex covers 540 hectares within the semi-submerged land at Dau Tieng Lake, the largest manmade lake in the country. Construction on the complex started in June last year and was completed in about 10 months.

Will Tay Ninh become a 'capital' of solar power?

It is estimated that electricity generated by the farm can meet the power demand of Tay Ninh and supply additional power to the southern region. Nguyen Van Binh, head of the Central Economic Commission, said at the inauguration ceremony that the plant would help turn Tay Ninh into one of the country's "capitals" of solar power.

How much of Viet Nam's electricity comes from wind and solar?

Less than 1% of Viet Nam's electricity capacity comes from wind and solar energy and rapid scaling up of Viet Nam's solar capacity will demonstrate to the Government of Viet Nam that variable renewable energy capacity can help to meet the country's rapidly growing demand for energy.
