

What does a flashing amber and white light on a Dell laptop mean?

A Dell laptop with alternatively flashing amber and white light indicates that you have attached an unsupported AC adapter/battery. To solve this, simply plug in a Dell-supported charger, and ensure the laptop is receiving enough power.

Why is my power button Amber?

(Error Code: 100013) If it is the power button that is amber it will mean a bad PSU or motherboard. Not sure if those have proprietary PSU, more than likely you could probably pick up a used/refurb Dell off eBay for about what you are going to be paying for a new PSU for that computer.

Why is my Dell 3240 light yellow?

Might need to power down and clear CMOS. Solid amber power button indicates a problem. Still unresolved problem. Computer still working fine after recent remote software installation. Dell has escalated problem to hopefully someone who may know the answer for the yellow LED light. The 3240 is around 5 years old.

What does an orange/amber battery light indicate?

If the battery status light emits an orange/amber light, know that you need to replace the system board. Replug the Dell charger back into its port. Now, press and hold the M key on your keypad. Then, push the power button to turn on your Dell laptop.

Why does my Vostro 420 have a solid amber power light?

I was shocked to discover that my problem - solid amber power light on a client's Vostro 420 - was caused by a duff CMOS battery. I'm guessing you are also right that there was just too little voltage to allow the PC to boot but enough to let the PC know there was a battery installed.

How do I fix my Dell laptop battery light?

If your Dell laptop battery light is blinking amber or orange, try the following steps: First, replug the Dell charger into its port. Then, press and hold the M key on your keypad, and push the power button to turn on your laptop. If the battery status light still emits an orange/amber light, it indicates that you need to replace the system board.
