

What makes solar power so lovable?

The playful summer vibes of the lead single are there in some places -- "Dominoes," for example, sounds like it should be played on a beach in Hawaii -- but it's a witchier kind of sun that Lorde is worshipping, and her world now is one of sage, crystals, and drying-out bones. Ultimately, what makes Solar Power so lovable is that it's deeply uncool.

Could 'solar power' be a smash?

The result is Solar Power, a weird, meandering album that is an exercise solely in fulfilling her own desires. Speaking to the New York Times last year, Lorde dismissed any idea that the album could be a smash, saying that she felt like she "could just chill out and flex a little bit."

What does solar power feel like?

Sonically, the tracks on Solar Power feel as if they blend into one, but it doesn't feel same-y. It gives it a sweet, psychedelic, meandering feeling that lets you sink into the album rather than feel jerked into the next track -- more than an album, it is a vibe.
