What are electric vehicle charging stations?

Electric vehicle charging stations, also called Electric Vehicle Supply Equipment (EVSE), are facilities that connect electric vehicles (EVs) to a power source to recharge their batteries. These stations replace the need for traditional fuel like gasoline or diesel by providing electricity, which powers EVs efficiently and sustainably.

What is a Level 1 electric car charger?

A Level 1 Electric Charger is the cheapest and slowest type of charging station. It uses a standard 120V household outlet and typically takes 8-12 hours to fully charge an electric vehicle. Manufacturers of Level 1 chargers include Alpha EV, Charzer, and Kazam.

What makes some EV charging stations different from others?

Though charging an electric vehicle is as good as plugging any electric device to the charging station, all-electric vehicle supply equipment (EVSE) or EV Charging Stations are not the same. Some equipment might need custom installations while others can be easily installed by plugging into a standard wall outlet.
