

# Distance between tesla charging stations for electric cars

How many miles can a Tesla charge per hour?

Tesla notes that Destination Charging can add up to 44 miles of range per hour. The actual range added will vary by the specific Tesla model. We recommend using Destination Charging for overnight charges/stops or to top off a charge.

What is the perfect use case for Tesla Destination Chargers?

Tesla Destination Chargers offer slower charging that's perfect for an overnight stop. An extensive network of Tesla Superchargers is available for quick charging on the go or for road trips. Teslas have a unique charging port and charger, but you can also use a J1772 adapter to charge at most EV charging stations.

How do I find a Tesla charging station?

Tesla provides several tools to help you find nearby charging stations, including: The Tesla mobile app: Available for both iOS and Android devices, the Tesla app allows you to locate Superchargers and Destination Chargers, check their availability, and navigate to them directly from your smartphone.

Can I charge a Tesla EV using a J1772 adapter?

While Teslas have a unique charging port and charger, you can use a J1772 adapter to charge at most EV charging stations. This allows you to charge your Tesla at a wide range of public charging stations. Additionally, Tesla offers its own network of Superchargers and Destination Chargers for quick and overnight charging.

How can I charge my Tesla at home for free?

Sign up for solar quotes on the EnergySage Marketplace to charge your Tesla with free solar energy when you're at home. There are a few easy ways to find Tesla charging stations, including Tesla's website, your Tesla app, and your car's navigation system. Tesla charging costs vary depending on the charger location and type of charging station.

How do I use a Tesla Destination Charger?

Here's how to use Tesla Destination Chargers: Park your Tesla near the Destination Charger. Locate the charging cable and connector. Plug the connector into your vehicle's charge port. Check the Tesla mobile app or your vehicle's touchscreen display to monitor the charging progress.
