

# Do tesla charging stations work for all electric cars

Can electric cars use Tesla Superchargers?

Electric cars with CCS connectors can use Tesla Superchargers. Electric vehicles (EVs) with Type 2 connectors can also use Tesla's destination charger network. To access the brand's charging stations, you'll need access to the Tesla app. Can any EV use a Tesla charging station?

Are Tesla Superchargers open to non-Tesla EVs?

All Tesla Superchargers and Level 2 stations should be open to non-Tesla EVs by the end of 2024. Use the Chargeway app to find compatible Tesla stations. Tesla has a robust network of Superchargers, and the company recently opened them to other vehicles manufactured by other automakers.

Does Tesla charge at a Supercharger station?

Tesla owners are billed for charging by the minute or kilowatt-hour for "supercharging" subject to local law. While Tesla drivers have the company's Level 3 and newer Supercharger stations exclusively right now, they can charge at most any EV charging station that utilizes adaptor cables.

Does Tesla have an EV charging network?

Tesla has invested a huge amount of money and resources into creating its own infrastructure and charging network for its vehicle owners - with the specialist EV manufacturer having installed over 1,000 Superchargers in the UK and Ireland since 2014. That makes it one of the most expansive EV charging network providers in the country.

How can BMW EV owners pay for charging at Tesla superchargers?

BMW says it's working on integrating a way to pay for charging with an in-car app as well as providing directions to Tesla chargers through the car's navigation. Existing EVs with the CCS-type port will also be compatible with Tesla's supercharger network through an adapter.

When will Lexus EVs have access to Tesla's Supercharger network?

Starting in 2025, electric Lexus models will come standard with a NACS charge port, which is Tesla's proprietary plug. This means the brand's EVs will have access to the nationwide Supercharger network.
