

What are Cabot semi-transparent stains?

Cabot Semi Transparent Stains are deep penetrating, linseed oil-based stains that beautify and protect exterior wood. These lightly pigmented stains enhance the natural beauty of the wood by allowing the grain, texture, and color variations within the wood to show through.

What does Cabot Stain contain?

Cabot Stains contain linseed oil and Trans-oxide to reflect UV damage, giving long-lasting protection. Cabot has traditionally been one of the leaders in the exterior wood restoration industry.

Is Cabot paint oil based?

This is not an "oil based" stain but "oil modified" which means it has SOME oil in it due to varying state by state U.S. environmental regulations. Cabot is teetering on the verge of "FALSE ADVERTISING" and needs to clarify the true chemical make-up of their paints and stains. That said, buyer beware!!!!...lawyer up, anyone??

Where can I find Cabot Oil based exterior stains?

Find Cabot Oil-based exterior stains at Lowe's today. Shop exterior stains and a variety of paint products online at Lowe.com.

What are the main ingredients in Cabot Wood and Deck Stains?

Cabot Wood and Deck Stains contain linseed oil and Trans-oxide to provide three-way protection for exterior wood and decking. They offer maximum durability from water damage while penetrating deep into the wood and reflecting UV damage, giving long-lasting protection.

Does Cabot stain & sealer need to be diluted?

The ready-to-use formula does not need to be diluted with water and can be used on all painted, stained and unfinished wood with great results. Bring back the rich, new-wood look on weathered wood with this brightener. Pick Cabot Semi-Transparent Stain + Sealer to highlight the grain of your wood with protective color.
