How much does it cost to charge an EV?

The average U.S. cost to charge an electric vehicle (EV) is about 16 cents per kilowatt-hour. One kilowatt-hour can move most EVs two to three miles. EV drivers can often benefit from reduced rates from their electric utility that encourage charging when demand is lowest, typically from 11 p.m. to 6 a.m.

How much does it cost to charge a car at home?

At home, it averages twelve cents per kilowatt-hour (kWh) to charge a car. This is less expensive than charging it in public charging stations.

Can You charge an electric car at home?

Charging an electric vehicle is a whole new experience, one that brings advantages and disadvantages for drivers. If you've been stopping at gas stations for decades, the thought of plugging in and waiting for your car to charge may be a bit too much to swallow. But over 80% of EV charging is done at home, where the cost savings are greatest.

Why do charging stations charge so much?

During rush hours, when everyone needs a charging port to recharge their cars, charging stations charge more per kilowatt. Different gas stations will have varied prices of fuel per liter, and the same applies to charging stations, which charge according to the charger level you are using and the demand for charging ports.

How much does it cost to charge a Tesla?

Tesla's superchargers cost an average of \$0.28 per kWh to use. If you're charging at stations that charge per minute, it's \$0.26 for cars charging below 60 kWh, while charging above 60 kWh costs \$0.13. So, even though it is possible to charge at a Tesla charging point, you'll need a connector to use the charging port.
