

# Does the power company pay you for solar

Who pays for solar energy?

In some cases, an electric utility company pays for solar energy if its customer uses less energy than the electricity generated from its solar system. Electric utility companies determine how much energy a customer has used in a year.

Do utility companies have to pay for solar electricity?

Therefore, utility companies don't need to compensate their customers for solar electricity sent to the grid. That said, most states currently have active net metering incentives, requiring any investor-owned utility companies (IOU) to offer credit to customers sending excess electricity to the grid.

Do utility companies benefit from solar energy?

Utility companies also benefit, since the excess solar electricity can be supplied to other buildings on the same electric grid. Generally, you will see more home solar renewable energy systems in places with favorable net metering laws.

Do solar panels get a credit on my electricity bill?

Alternatively, if your solar panels produce more electricity than you use in a given month, you may see a credit on your electricity bill, depending on your utility company's net metering policy. Net metering is a solar incentive that compensates you for excess solar electricity generation.

How much is an electric bill with solar?

As well as people from the United States pay 12.57¢ per kWh. Thus the average American's electric bill comes to \$113 per month. Thus net meters are used by utility companies for what they do base on their solar energy systems, based on America's average electric bill. [How to Read Electric Bills With Solar?](#)
