

## Does the scarlett solo have phantom power

Can I use my Scarlett microphone with 48V Phantom Power?

If you're unsure, please check your microphone's user guide to ensure it is safe to use with 48V phantom power. Inst, or instrument, changes the impedance and input level of the 6.35mm (1/4") jack inputs on your Scarlett so the inputs sound their best for either an instrument or line-level source.

Is Scarlett a good preamp?

The Scarlett's high-quality mic preamp provides 48V phantom power and is also equipped with a brand-new Air Mode switch. Electric guitars and basses can be connected directly to the line input and the impedance adjusted to Hi-Z accordingly. The Scarlett Solo also looks great and is very attractively priced.

How much power does a Scarlett solo need?

The Scarlett Solo requires 900mA of power to work. Outputs 1 and 2 are line-level outputs to connect your Scarlett Solo to an amplifier or active monitors. The outputs are balanced 1/4" TRS jack outputs, you can use them with either unbalanced TS or balanced TRS jack cables and connect to speakers with 1/4" jack, RCA or XLR inputs.

Does Scarlett solo have a gain control?

The Scarlett Solo has two analogue gain controls for preamp 1 (Line/Inst) and preamp 2 (Microphone). To control the input gain, turn the gain control for the preamp you are using clockwise to increase the level or anti-clockwise to decrease the level.

How do I Turn Off 48V on my Scarlett solo?

If you activate 48V for inputs 1 or 2 then plug a 6.35mm (1/4") jack into the line-level or instrument input on the front panel, your Scarlett Solo automatically disables 48V for the corresponding rear microphone input. To change inputs 1 or 2 between instrument and line from Focusrite Control 2 click the Inst button once.

What is a Scarlett solo?

The Scarlett Solo, now in its third edition, is the most compact and portable model within Focusrite's acclaimed Scarlett series of USB audio interfaces for Mac and PC. It features an XLR mic input, a balanced line input for synthesizers and other line-level audio sources, and a pair of balanced outputs for monitoring.
