

Why should you choose a home solar system in South Africa?

Loadshedding has become a regular part of life in South Africa, often disrupting daily activities and business operations. A home solar system provides a reliable power supply during these interruptions.

What size Solar System do you need in South Africa?

Typically, South African households require solar systems with an inverter capacity in the range of 3kW to 12kW, depending on their energy consumption needs. To determine the size of the solar system you need, it's essential to calculate your household's average energy consumption.

Are solar panels tax deductible in South Africa?

Recently, in South Africa's budget speech for 2023/2024, various tax incentives were announced for the implementation of solar systems. Individuals can claim back up to R15 000 for solar panels installed & companies receive a 125% benefit of the total panel cost on their taxable income.
