

How much solar energy does Dominion Energy have?

Since 2013, we've helped bring 2,200 megawatts (MW) of solar into operation in 10 states. That is enough energy to power about 550,000 homes at peak output. Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035.

How many solar farms does Dominion own?

Dominion, which has the second-largest solar fleet in the US, will own or acquire four solar farms totaling 329 MW, and it's also made 13 power-purchase agreements (PPAs) totaling 435 MW with independently owned solar projects. That's enough to power nearly 200,000 homes at peak output.

Does Dominion Energy offer community solar?

Customers receive a monthly credit on their bill for the electricity generated by their panels. (CSP) is a renewable energy solutions provider for utilities and the communities they serve. CSP has partnered with Dominion Energy to offer their community solar product to Dominion Energy electric customers across South Carolina.

What is Dominion Energy Virginia?

Dominion Energy Virginia, or DEV, incorporates its electric utility operation in Virginia and some parts of North Carolina, which serves around 2.7 million customers with various demand needs. It has the most significant portion of electric generating capacity with around 23,800 megawatts which generated \$10.2B in revenue in 2024.

How many states does Dominion Energy have solar energy services?

Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035. Learn more about what we are doing in each state: We are committed to growing clean energy and solar generation across the country.

What does Dominion Energy do?

Dominion Energy (NYSE: D) is one of the largest energy companies in the US, providing electricity to millions across Virginia, North/South Carolina, and natural gas to various states. Its current portfolio has more than 30,000 megawatts of electrical generation and more than 90,000 miles of electric transmission/distribution lines.

Appalachian Power customers are one step closer to being able to sign up for solar power without having to own panels themselves, as legislation that would create a shared solar program for the utility's service territory
