

Does Dominion Energy offer net metering?

Dominion Energy offers net metering in Virginia and North Carolina. While they offer solar power in other states, these are the only two states that allow you to send power back to the grid from your own solar system.

Does Dominion install a net meter?

After installation and inspection, Dominion will install a net meter on your home soon after your solar installation is complete. The net meter will measure how much energy you have used vs. how much you produced, and Dominion will keep track of the credits. Here's how net metering looks on an actual Dominion bill example.

Will my Dominion utility bill change if I switch to solar?

When you switch to solar energy, your Dominion utility bill will change because you will be participating in net metering. Wondering what net metering actually is, and what your utility bill will look like as a result? Read on! What is net metering?

Will changes to net metering affect solar energy in Virginia?

These are decisions that will significantly impact the future of solar energy in Virginia. Dominion Energy and Appalachian Power are trying to make changes to net metering rules in Virginia that could eliminate the energy savings for solar panels installed in 2025 and beyond. Here's a rundown of what's happening and what to do about it.

Does Dominion Energy offer a solar purchase program?

Dominion Energy used to offer a Solar Purchase Program. To be eligible, customers had to have two meters installed, and all electricity generated by the solar system was sold back to Dominion Energy for 15 cents per kilowatt-hour.

How does net metering work in Virginia?

Essentially, it allows solar panel owners to offset their electricity costs by generating their own power. In Virginia, net metering is regulated under Virginia code §56-594 and applies to investor-owned utilities (Dominion Energy and Appalachian Power) as well as electric cooperatives.
