

How much solar energy does Dominion Energy have?

Since 2013, we've helped bring 2,200 megawatts (MW) of solar into operation in 10 states. That is enough energy to power about 550,000 homes at peak output. Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035.

Does Dominion Energy offer community solar?

Customers receive a monthly credit on their bill for the electricity generated by their panels. (CSP) is a renewable energy solutions provider for utilities and the communities they serve. CSP has partnered with Dominion Energy to offer their community solar product to Dominion Energy electric customers across South Carolina.

How many states does Dominion Energy have solar energy services?

Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035. Learn more about what we are doing in each state: We are committed to growing clean energy and solar generation across the country.
