

How many solar projects will Dominion Energy have in Virginia?

Today's approval marks a significant expansion of Dominion Energy's growing solar fleet, which is currently the second largest in the nation. When those projects are complete, the company will surpass 4,600 MW of approved solar projects in Virginia, enough to power more than 1.1 million homes at peak output.

How much solar energy does Dominion Energy have?

Since 2013, we've helped bring 2,200 megawatts (MW) of solar into operation in 10 states. That is enough energy to power about 550,000 homes at peak output. Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035.

Does Dominion Energy offer community solar?

Customers receive a monthly credit on their bill for the electricity generated by their panels. (CSP) is a renewable energy solutions provider for utilities and the communities they serve. CSP has partnered with Dominion Energy to offer their community solar product to Dominion Energy electric customers across South Carolina.

What does Dominion Energy Virginia do?

"These projects deliver on our promise of reliable, affordable and increasingly clean energy for our customers," said Ed Baine, President of Dominion Energy Virginia. "Through our investments in offshore wind, battery storage and solar, Virginia continues to make progress on its clean energy transition."

Does Dominion Energy offer net metering in Virginia?

Our parent company Dominion Energy offers the top utility net metering program in Virginia to incentivize renewable energy adoption to reduce carbon output for VA residents and businesses. Interconnection standards define how a distributed generation system, such as solar photovoltaics, can connect to the grid.

How many states does Dominion Energy have solar energy services?

Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035. Learn more about what we are doing in each state: We are committed to growing clean energy and solar generation across the country.
