

How many solar projects does Dominion Energy Virginia have?

The proposal includes 11 utility-scale solar projects, two small-scale distributed solar projects, one combined solar and storage project, and one stand-alone energy storage project, which will be owned and operated by Dominion Energy Virginia.

How much solar energy does Dominion Energy have?

Since 2013, we've helped bring 2,200 megawatts (MW) of solar into operation in 10 states. That is enough energy to power about 550,000 homes at peak output. Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035.

What does Dominion Energy Virginia do?

"These projects deliver on our promise of reliable, affordable and increasingly clean energy for our customers," said Ed Baine, President of Dominion Energy Virginia. "Through our investments in offshore wind, battery storage and solar, Virginia continues to make progress on its clean energy transition."

How many states does Dominion Energy have solar energy services?

Dominion Energy currently has solar energy services in five states. We are planning a significant expansion of large-scale solar energy in Virginia -- up to 16,100 megawatts by the end of 2035. Learn more about what we are doing in each state: We are committed to growing clean energy and solar generation across the country.

Does Dominion Energy offer community solar?

Customers receive a monthly credit on their bill for the electricity generated by their panels. (CSP) is a renewable energy solutions provider for utilities and the communities they serve. CSP has partnered with Dominion Energy to offer their community solar product to Dominion Energy electric customers across South Carolina.

How many solar farms does Dominion own?

Dominion, which has the second-largest solar fleet in the US, will own or acquire four solar farms totaling 329 MW, and it's also made 13 power-purchase agreements (PPAs) totaling 435 MW with independently owned solar projects. That's enough to power nearly 200,000 homes at peak output.

RWE, a leading renewable energy company, has signed eight long-term utility-scale PPAs with Dominion Energy Virginia for seven solar projects in the state totaling more ...

The projects will generate 764 megawatts (MW) of electricity, enough to power nearly 200,000 homes at peak output, and include four solar projects totaling 329 MW that will be owned or ...

Once in operation, the projects will generate more than 800 megawatts (MW) of carbon-free electricity, enough to power about 200,000 Virginia homes at peak output. ...

Approval from the SCC will significantly expand Dominion Energy's solar portfolio in the state, which is currently the second largest in the US. Once the newly approved projects ...

RWE, a leading renewable energy company, has signed eight long-term utility-scale PPAs with Dominion Energy Virginia for seven solar projects in the state totaling more than 300 megawatts (MW) capable of producing more ...

, Virginia has installed more than 730 megawatts (MW) of solar energy panels, making it the 17th state with the most installed solar according to the SEIA's national rankings. This ...

As the fastest-growing energy source in Virginia, solar energy allows for a wide range of applications, from small-scale roof-top systems to commercial buildings to utility-scale solar farms. Read on to find out how thousands of customers ...

US utility Dominion Energy Virginia has received approval from the Virginia State Corporation Commission (SCC) for two dozen new solar and energy storage projects. The ...

The projects will generate 764 megawatts (MW) of electricity, enough to power nearly 200,000 homes at peak output, and include four solar projects totaling 329 MW that will be owned or acquired by Dominion Energy ...

As the fastest-growing energy source in Virginia, solar energy allows for a wide range of applications, from small-scale roof-top systems to commercial buildings to utility-scale solar ...

, Virginia has installed more than 730 megawatts (MW) of solar energy panels, making it the 17th state with the most installed solar according to the SEIA's national rankings. This solar energy boom is mainly due to the ...

On Friday, the Virginia State Corporation Commission (SCC), the state's regulatory agency, approved 17 solar farms capable of generating 764 megawatts (MW) of clean power ...

US utility Dominion Energy Virginia has received approval from the Virginia State Corporation Commission (SCC) for two dozen new solar and energy storage projects. The projects - which were...

Approval from the SCC will significantly expand Dominion Energy's solar portfolio in the state, which is currently the second largest in the US. Once the newly approved projects are completed, the company will have more than ...
