

How do drones work in Eve?

Compared to the other combat weapons systems in EVE, drones provide a great deal of flexibility. On the other hand, drones need to travel to their targets before applying their damage, and they can be destroyed by enemy fire. The drone control window, showing drones in the drone bay and drones in space.

What should you consider when using a drone in EVE Online?

There are several key aspects to consider when using drones: EVE Online features five distinct drone types, each designed for specific roles: Specialized for scouting and tackling, light drones are fast, agile, and excel at catching hostile targets off guard.

What is a drone in EVE Online?

Drones are artificial intelligence-powered spacecraft that can be deployed by players to perform a variety of tasks, including combat, mining, and repair. They are an essential part of the EVE Online universe, providing players with additional capabilities that can give them an edge in various activities.

What are the different types of drones in EVE Online?

EVE Online features five distinct drone types, each designed for specific roles: Specialized for scouting and tackling, light drones are fast, agile, and excel at catching hostile targets off guard. Versatile and adaptable, medium drones offer a balance between firepower and durability, making them suitable for a wide range of combat scenarios.

Are drones affected by Eve Online?

Yes, drones are affected by EVE Online's game mechanics, including CONCORD and faction standing. For example, if a player's faction standing is low, they may face penalties when deploying drones in certain areas, such as increased aggression from NPCs or reduced drone performance.

Why are heavy drones less common in Eve?

Heavy Drones are least common of all the sizes. This is because the majority of PVP ships in EVE are Battlecruiser or smaller and only a few Battlecruisers and T2 Cruisers are likely to use Heavy Drones. For PVE (VNI is the obvious poster child) you want to use the best damage for the rats you are killing. That's the only factor worth considering.

L'existence du drone a été introduite par Mykhailo Fedorov, le vice-premier ministre ukrainien chargé de l'innovation, du développement de l'éducation, des sciences et des ...

POS towers have two bays, a fuel bay and a "stront" bay. The stront bay holds Strontium Clathrates which determine how long the tower will remain in reinforced mode if attackers manage to reduce the POS shields to ...
