

# Eaton corporation electric car charging stations

What is Eaton's electric car charging station xchargein?

Eaton's electric vehicle charging station xChargeIn was designed to charge electric cars and includes four different series A,X,M and S with different application areas.

How many charging stations can a Eaton charging system have?

A charging system can consist of one M-series master station and up to 15 S-series charging stations. Eaton offers a range of accessories that make our innovative charging stations even more efficient and cost-effective. Should the cover of the charging station break, a new Eaton housing can be ordered at any time.

What is Eaton EV charging?

Eaton EV charging is an intelligent power management company named Eaton, dedicated to improving the quality of life and protecting the environment for people everywhere. We are guided by our commitment to do business right, to operate sustainably and to help our customers manage power - today and well into the future.

What does Eaton do?

Eaton is developing comprehensive solutions to integrate EV charging infrastructure and distributed energy resources (DERs). Our solutions work to optimize sustainability, resiliency and cost-effectiveness. Let us help you implement electric vehicle charging at your site.

Do Eaton EV chargers work out of the box?

We're dedicated to providing our customers with interoperable solutions that work directly out of the box, regardless of your vehicle manufacturer. In 2024, Eaton will offer North American Charging Standard (NACS) connectors for all of our new Green Motion EV chargers and retrofit options for our existing chargers.

How does Eaton xcomfort work?

Through the Smart Home Controller (SHC) app, Eaton offers an integrated package of pre-selected xComfort components, as well as a matching control system for the charging stations. The X1 contact is controlled by a potential-free output, which, when active, will cause the charging station to start the charging process.

device in online or offline charging systems and manages the connected vehicles via individual charging stations of the S series. A charging system can consist of one M series ...
