

Does Southern California Edison have a solar program?

Southern California Edison (SCE) has solar programs that can help you save money on energy bills, but they are set to expire soon.

Does Southern California Edison have a net metering program?

Southern California Edison offers a net metering program that allows solar energy system owners to receive credit for their excess solar electricity. These credits can be used when your solar panel system isn't producing enough power to meet your electricity demands.

How many solar customers does SCE support?

SCE supports over 250,000 solar customers (and more every day!) who are connected to the energy grid. Customers can also purchase clean electricity exclusively generated by solar when they enroll in the Green Rate plan.

How do solar customers get credited?

Solar customers in SCE territory are credited for the energy they send to the grid at the retail rate, minus about 2.5 cents/kWh in non-bypassable charges discussed above. The price they get credited depends on whether the energy was sent during peak or off-peak hours.

What is the cost of solar interconnection?

Under NEM 2.0 and NEM 3.0, the interconnection request fee is \$75 for SCE customers. To fulfill your request, SCE will examine your system to ensure that your solar installer complied with...

Does SCE pay for solar?

Under the new NEM 3.0 rules, the price that SCE will pay you for solar you send to the grid is set to drop by about 75%. However, if you act now, you can still lock in net metering 2.0 (NEM 2.0) rates, which will save you about 60% more over 20 years compared to NEM 3.0.

Unlock the power of solar energy with Southern California Edison's Solar Program. Learn about incentives and eligibility in EnergyPal's 2023 guide.
