

How much does it cost to charge an EV in Australia?

The cost to drive 100 km is on average estimated at \$4 for EVs and \$14 for ICE vehicles. Learning the basics on the cost of charging an electric car in Australia can help you determine your driving expenses. An EV can be charged at home with your own charging system, or outside at a public charging station.

Are there electric car charging stations in Australia?

Electric car charging stations are increasing in numbers across Australia as more and more locations roll out, though it can often be difficult to find your nearest charger, even if you've been on the road in an EV for a while. If you've been curious about electric vehicle charging in Australia, we've got the answers to your questions below.

Where are the best EV charging locations in Australia?

Plugshare's community is made up of dedicated EV drivers, and right now it's one of the best resources on EV charging locations. You'll notice we haven't put every electric car charging station in Australia into one big list.

How much does an electric car battery cost in Adelaide?

Those who live in Adelaide pay the most, with a standard range (55kWh) electric car battery costing \$27.83 to charge. Public charging stations use DC chargers, or fast chargers, to get you back on the road as soon as possible. Charging stations offer different price rates depending on the company that owns the charger.

How much does electric car charging cost?

The cost of public electric car charging at these stations varies from 0 to 30 c/kWh. The current price is found in the Chargefox app. Some apps like A Better Route Planner (ABRP) charge a small fee for helping you find free and available EV charging stations. Subscription may cost around \$7 for 1 month of usage and up to \$70 for the whole year.

Can You charge an electric car at home in Australia?

Most electric cars in Australia are charged at home using Level 2 AC chargers. The cost of charging your car at home depends on the time of day you charge, which state or territory you live in and whether you use solar or grid electricity. Those who harness their rooftop solar panels to charge their EVs will pay the least to keep their car running.
