

Where can I charge my electric car?

Although electric car drivers primarily charge at home, workplace and public chargers are increasingly available in communities nationwide. Use the EV Charging Station Map to find nearby charging. Level 1 is the slowest method, but sufficient for drivers who charge overnight and travel 30-40 miles per day.

How much does electric car charging cost in California?

Contact your electric utility to find out more. Find out how simple home charging is for current electric car drivers. While electricity costs vary, the average price in California is about 18 cents per kilowatt hour (kWh).

What is a charging station?

Charging Station is a physical address where one or more chargers are available for use. A charging station can be public, shared private, or private. Level 1 chargers use alternating current electricity at 120 volts to provide about 5 miles or less of range per hour of charging.

How much does it cost to charge an electric car?

Find out how simple home charging is for current electric car drivers. While electricity costs vary, the average price in California is about 18 cents per kilowatt hour (kWh). At this price, charging an electric car such as the Nissan LEAF with a 40-kWh battery with a 150-mile range would cost about \$7 to fully charge.

How long does it take to charge an electric car?

Electric car charging is simple, cost-effective and convenient, particularly when you are plugged in at home--filling up your car even while you're asleep. How long it takes to charge depends on the charging equipment and the size of the car's battery and its available charging capacity.

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.
