

How do I add EV charging stations?

Add EV Charging Stations Zoom in on the map and click on station markers to review details. Ensure compatibility with your vehicle, then click "Add to Trip" to include it. Repeat the process to add additional charging stops.

How do I find out if a charging station is nearby?

To find out if a charging station is nearby, use ChargeFinder's station page which shows relevant information like charging speed, outlet type, price, and location. Additionally, the "Food and Shopping Nearby" feature helps you find points of interest near the charging station.

Where can I find charging stations?

ChargeFinder is available as an app for iOS and Android. Specific city pages provide a good overview of charging stations in a particular city. Download the app from Apple App Store or Google Play. ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto, and Android Automotive.

What if a station is missing from the charging map?

If a charging station is missing from the map, it is easy for anyone to add it. It is also possible to edit and update information on all existing stations.

What is the most common type of charger shown on the map?

The most common type of charger shown on the map is fast chargers that provide 50 kW, which are shown in dark blue on the map. Destination chargers usually provide an output from 3 kW to 22 kW.

What power level does a destination Charger offer?

Destination chargers usually provide an output of 3 kW to 22 kW. The color shades on the map indicate the power level: light orange for 3-7 kW and darkest orange for 22 kW. The most common are fast chargers, shown in dark blue, which provide 50 kW.
