

Electric car charging stations cost commercial

How much does it cost to install an EV charging station?

Installing an EV charging station at your business can cost anywhere from a few thousand dollars to over \$100,000. Your total costs depend on the charging equipment, labor and materials for electrical and landscaping work, and where you intend to install the chargers. EV chargers are classified as Level 1 (L1), Level 2 (L2), and Level 3 (L3).

Are EV charging stations a good option for your business?

If the benefits outweigh the costs, then EV charging stations are a great investment for your business! Most commercial facilities choose Level 2 or DC fast chargers, which are priced at the mid-range and high-end respectively, while Level 1 chargers are the most affordable.

Who pays for the installation of EV charging stations?

The EV charging contractor will install your stations for you and take on the cost, then collect the revenue your stations receive from drivers charging their EVs. A variation of this option would be the EV charging installer splitting both the cost and revenue with you.

How much does it cost to install a commercial charging station?

Level 1 commercial EV charging stations utilize a 120-volt, single-phase AC power outlet and have a power rating of between \$300 and \$1,500 (before permits and installation). They are the cheapest to install.

How many EV charging stations are there?

In fact, as Teslas and similar electric cars hit the road, there are now more than 64,000 public EV charging stations across the U.S. as of December 2023. In particular, fast commercial EV charging station installations have grown by 70% in three years.

What is the cheapest EV charger?

Albeit the cheapest option, Level 1 chargers are better suited for home charging as they only add a few miles of range per hour. Most commercial EV charging stations use L2 or L3 chargers. A Level 2 charger starts at around \$400, whereas Level 3 charging equipment alone can cost tens of thousands of dollars.
