

Should motorway services upgrade electric car charging facilities?

Changes to planning legislation announced in the Autumn Statement should let motorway services upgrade electrical capacity and install more high-speed electric car chargers... The Government has announced changes to the planning system that should speed up the upgrading of electric car charging facilities at motorway service stations.

Are electric cars charging on the motorway?

Electric vehicles (EVs) are gaining in popularity, offering an environmentally-friendly alternative to traditional cars. However, one of the major concerns for drivers is charging on the motorway. What infrastructure is available and how can you optimise your journey? This article explores these key issues.

Are there public charging stations in the UK?

The number of electric cars and plug-in hybrid cars on the road around the UK continues to rise, and with it, the number of public charging stations also grows by the day. For people that are new to electric or hybrid, charging can cause some initial confusion or apprehension, which is understandable.

Can EVs charge on a motorway?

Most rapid and ultra-rapid charging points in Europe use standard connectors such as CCS (Combined Charging System) or CHAdeMO. This ensures that the majority of EVs can use the same charging points, making it easier to charge on the motorway without having to worry about compatibility. How much does it cost to charge an EV on the motorway?

Where are electric car charging stations?

Charging points can be found at motorway services, multi-storey car parks, supermarkets and retail park car parks, as well as on local and residential roads (as standard charge points, or as lampposts converted into electric-vehicle chargers by the local council).

Are EV charging points available in the UK?

Therefore it's good to know a bit about charging at services for people who are new to EVs and planning to buy an electric or hybrid car. The only provider of motorway charging points in the UK is Ecotricity, who have partnered with Gridserve to develop the Electric Highway; Europe's first nationwide charging network.
