What is the National Park Service Electric Vehicle map?

The National Park Service (NPS) electric vehicle map, developed in collaboration with the National Renewable Energy Laboratory (NREL), shows the locations of electric vehicle (EV) charging stations within the boundaries of national parks and some nearby gateway communities associated with national parks.

Where can EV charging stations be found?

In collaboration with the National Park Service, the National Renewable Energy Laboratory has built an interactive EV charging map showing charging stations at or en route to more than 400 national parks, monuments, and historic sites. Photo from iStock Snacks: Check. Road trip tunes: Check.

What is open charge map?

Open Charge Map is the world's largest Open Data registry for Electric Vehicle Charging Locations. Browse locations, Add Comments, Photos or Add new locations for others to find.

Are electric vehicles a good option for national parks?

Electric vehicles (EVs) are a green and efficient option for both NPS fleet vehicles and for visitors traveling to and within national parks. Because EV use reduces air pollution associated with conventional fossil fuel-powered vehicles, they can help preserve the long-term quality of parks' natural resources.

Is the new EV charging map aligned with NPS values?

The new EV charging map is in strong alignment with NPS values, including a gradual transition to clean energy. The National Park Service's Green Parks Plan, the third edition of which launched in 2023, outlines new steps to achieve net-zero greenhouse gas emissions and zero-emission transportation methods.

The National Park Service (NPS) electric vehicle map, developed in collaboration with the National Renewable Energy Laboratory (NREL), shows the locations of electric ...
