Read more about the range of government grants for EV chargers. Home EV charging speeds vary depending on two main factors - the power output of the charger and the battery size of your electric car.

How much does a car charger cost in Ireland?

The cost of installing a car charger in Ireland can vary depending on several factors, including: The installation of a home charging point typically costs around EUR1,200 to EUR1,600 according to SEAI. To get an accurate estimate, contact several installers or local electricians who can provide you with a detailed quote based on your requirements.

What is a home EV charger?

A home EV charger is a simple concept, it acts as a conduit between the power grid in your home and the battery of an electric vehicle. All chargers, where Level 1 plug-in or Level 2 full charger models, work basically the same way. The charger draws power from your home like any appliance.

How much power does an EV charge in Ireland?

EVs in Ireland typically support up to 7.4 kW for home charging, but some may accept higher levels of power. Matching your charger's power capacity to your vehicle's limits will ensure optimal performance. Modern EV chargers often come with smart features like WiFi connectivity, app control, and automatic scheduling.
