# SOLAR PRO. Electric fence solar power

## What is a solar-powered electric fence?

A solar-powered electric fence is a sustainable security solution of an electric fence in which the fence is directly linked to solar panels. The solar panels capture sunlight and convert it into electricity to power the electric fence.

#### How does solar electric fencing work?

With solar electric fencing, electric fencing typically does not have a fence and instead has solar panels that are connected wirelessly to an electric fence charger. The charger is battery-powered and can be placed anywhere in the fence area. The charger requires sunlight, which causes solar cells on the panel to produce electric current.

### How to install a solar-powered electric fence?

The first step in installing a solar-powered electric fence is to decide where you want it to be. You'll need to choose an area that gets plenty of sunlight, as the solar panel needs to be able to charge the battery. The fence should also be placed in an area where animals are not likely to wander off or get stuck in it.

### Should you buy a solar-powered electric fence?

It's important to keep in mind that livestock fur will be thicker during winter months. The advantage to any solar-powered electric fence is its great for rural areas that might experience difficulties with electrical connections. By using the power of the sun,light is converted into energy via a solar charger (a small PV panel).

#### Can a solar panel charge an electric fence?

Yes, solar power is strong enough to reliably charger an electric fence. In fact, solar power is more efficient at generating electricity than a traditional gas generator, and can produce all the power you need to keep your animals in, or certain animals out. Can you run an electric fence off a solar panel?

#### How much power does a solar power fence use?

In general, the power consumption of a power fence is about 5-40 watts, depending on its size and model. You can choose Sungold solar panels with different capacities and sizes to power any size of power fence. Solar power electric fence are an environmentally friendly solution for securing your home garden or livestock.
