

How does Elgato Eve degree work?

According to Elgato, the Eve Degree has been built to track temperature and humidity with "unrivaled precision." Unlike most HomeKit devices, the entire Elgato Eve lineup, Eve Degree included, works over Bluetooth. No WiFi network or hub is required, but to use it away from home, an Apple TV or iPad is necessary.

How much does Elgato Eve degree cost?

Priced at \$69.99, the Eve Degree feels like an iteration of the cheaper Eve Weather. It monitors temperature, humidity, and atmospheric pressure like the Eve Weather, but it's smaller, better designed, and it includes an LCD display. Eve Degree is palm-sized and the tiniest of Elgato's temperature sensors, measuring in at 2.1 x 2.1 x 0.6 inches.

How long does Elgato Eve degree last?

Elgato says the Degree will run for one year on one battery, which is impressive. The Eve Degree is small, so you can put it nearly anywhere. So, the Eve Degree is the sort of thing you either use as a single-purpose item--just to tell you the temperature and humidity in a single location--or as part of a more unified smart system.

Is Elgato's Eve degree better than the eve weather?

Elgato's Eve Degree is functionally identical to the cheaper Eve Weather with the exception of the display, the new design, and better atmospheric pressure accuracy, so if a display isn't needed, the Eve Weather is \$20 less expensive at \$49.99 and perhaps the better buy for outdoor use, where most monitoring will be done from inside the house.

Does Eve degree need to be charged?

Because it uses a replaceable CR2450 battery, the Eve Degree does not need to be charged. According to Elgato, the battery should last for a year and it costs around \$5 to replace. Eve Degree has an IPX3 water resistance rating, which means it can withstand spraying water for up to five minutes.

How long does Eve degree battery last?

According to Elgato, the battery should last for a year and it costs around \$5 to replace. Eve Degree has an IPX3 water resistance rating, which means it can withstand spraying water for up to five minutes. That means it can hold up to a little light rain, but in a downpour, it needs to go indoors.
