

Energizer 2100w lifepo4 portable solar power station

What is the battery capacity of Energizer pps2000?

With a capacity of 2150Wh and a 2100W output, it can keep essential appliances running and devices charged in a blackout. You can also take it with you on the road in your RV, boat, truck, trailer or campervan. A long lasting LiFePO4 battery ensures you'll be using the Energizer PPS2000 for years to come.

How many outlets does the Energizer pps2000 have?

The Energizer PPS2000 has 17 outlets in total. You can easily run multiple appliances at the same time and plug in different kinds of devices and electronics. AC power is delivered via six 110V outlets with a combined output of 2100W.

How long does it take to charge Energizer pps2000?

AC input when charging from a wall outlet is 500W, which takes about 4.5 hours to recharge the battery. Solar input is higher at 900W, so you can charge the Energizer PPS2000 faster using solar panels. A 900W array will recharge it in about 2.7 hours on a sunny day. The Energizer PPS2000 has dual solar + AC charging.

How long do Energizer pps2000 batteries last?

In addition to the large capacity, another thing we love about the Energizer PPS2000 is the kind of battery it uses. Instead of a regular lithium ion battery, it has a lithium iron phosphate (LiFePO4) battery. LiFePO4 batteries can last 2000-3500 before they permanently lose 20% of their capacity. Overall lifespan is usually 10 years.

Why is the Energizer pps2000 power station so versatile?

This is one of the main reasons the PPS2000 power station is so versatile. With this capacity, the Energizer PPS2000 can power small and medium size appliances for hours, while also recharging devices, and running smaller electronics like lights and fans.
