

Is envision AESC building a battery plant in Alabama?

Envision AESC, the battery-producing arm of Shanghai-based world-leading green technology company Envision Group, said on March 16 it will build a new plant in the US to provide battery modules for Mercedes' production of all-electric EQ vehicles in the state of Alabama.

Where is envision AESC building a lithium-ion battery plant?

Envision AESC announced a \$2 billion investment to build a lithium-ion battery plant in Bowling Green, Warren County, Kentucky. According to the press release, the new gigafactory will have an annual output of 30 GWh (with the potential to expand to 40 GWh), which is expected to be sufficient for up to 300,000 vehicles (by 2027).

Where are envision AESC batteries made?

Envision AESC has battery plants also in Japan (the second one is under construction), the UK (the second one is under construction), China, and a project under construction in France. According to the press release, the plan is to expand the manufacturing capacity to 300 GWh per year by 2026.

When will envision AESC start production?

Production is expected to begin in 2025. Envision AESC already has a small battery plant in the US, located in Tennessee, which supplies Nissan. With the new, bigger plant, the company would like to supply "next generation battery technology" for "multiple global automotive manufacturers".

Does envision AESC have a Cell Factory?

Since this takeover, Envision AESC already has a cell factory in the USA: not far from the Nissan vehicle plant in Smyrna (Tennessee), Envision AESC produces battery cells for the Japanese manufacturer. [businesswire.com](https://www.businesswire.com)

Will envision AESC build a new EV battery plant in Kentucky?

The construction plans echo the company's move to add several EV battery manufacturing plants in the southern U.S. Once completed, the Envision AESC site would raise Kentucky's overall EV battery manufacturing capacity to 116 GWh, making it top among U.S. states, according to officials.

Envision AESC has set up a smart battery industrial park in a local development zone of Ordos, China's Inner Mongolia. The company intends to use the industrial park to manufacture batteries that are high in energy density, ...
