

Does Eskom need a solar system?

Even systems that are independent and operating off-grid still have to supply proof of this to the utility, it said. Eskom has been pushing to get household rooftop solar systems registered and properly integrated with the national grid.

Will Eskom come after grid-tied rooftop solar in South Africa?

Power utility Eskom has doubled down on its intentions to come after households with grid-tied rooftop solar in South Africa, saying they have until March 2026 to qualify for exemption from high registration fees. Even systems that are independent and operating off-grid still have to supply proof of this to the utility, it said.

Do rooftop solar systems have to comply with Eskom regulations?

However, with the deadline set for March 2026, homeowners with rooftop solar systems must now decide whether to comply with Eskom's regulations or risk facing fines and other enforcement actions.

Are South Africa's solar systems being punished by Eskom?

Despite the positives of South Africa's alternative energy boom for households and Eskom's strained infrastructure, those who have installed solar systems are still being punished by the power utility.

Does Eskom have a problem with grid-tied solar systems?

However, recent action by Eskom has raised concern within the renewable energy community. In December 2024, you might remember, Eskom began visiting customers with grid-tied solar systems, demanding that additional equipment installations and new approvals [were] needed to ensure compliance, and they've warned of hefty fines for non-compliance.

Why is Eskom registering a solar system?

The registration process ensures that solar systems do not compromise the safety and reliability of the grid, she added. Eskom's rules have been in place since 2019, and various awareness campaigns have been conducted to encourage compliance.

**ESKOM URGES PUBLIC TO APPLY FOR SOLAR SYSTEMS.** According to BusinessTech, many people are using solar energy to reduce their electricity bills and lessen ...

Tuesday, 01 April 2025: Eskom has launched a campaign to help residential owners of Small-Scale Embedded Generation (SSEG) systems, including photovoltaic (PV) installation systems, continue to be able to become ...

Firstly, they could charge these solar users more for electricity when they were using Eskom power. Secondly, they could increase the fixed costs to 70% of the user's electricity bill.

Yelland said that around 18 months ago, Eskom stated that there were around 27,000 low-voltage solar PV and battery energy storage installations connected to the network ...

A few years ago the cost of a solar photovoltaic panel system was R5/kWh compared to Eskom's 50c/kWh. Solar power has now plummeted to R1/ kWh while Eskom has risen to R1.84/kWh - and keeps on rising. This drop in ...

Eskom said South Africans who use solar power systems generate most of their electricity during the day. The power utility explained that this forces it to ramp up faster to meet evening demand, which affects the power system ...

Eskom has issued a stern warning to homeowners with rooftop solar systems, stating that all installations must be registered with the utility or risk being deemed illegal--a process that could...

Solar installations up to 50kW may qualify for an exemption from legislated registration-related fees until March 2026. This is according to Eskom, after reports emerged that the power utility was ...

Eskom is enforcing stricter regulations on grid-tied solar power systems, declaring those not registered with the utility as "illegal," even if they don't feed power back into the grid. Customers with non-compliant systems ...

Eskom and Nersa's proposed electricity pricing reforms in South Africa could see many households and businesses with solar power pay substantially more for electricity.

Eskom's proposals for radical electricity pricing changes would result in many households with lower consumption -- including those with solar power -- paying substantially more for ...

Eskom has urged the public to register their solar systems installations, as unregistered grid-tied solar systems are now considered illegal. South Africans have until March 2026 to register...

Eskom is urging the public to register their solar systems, as all unregistered grid-tied solar systems are now deemed illegal. The public has until March 2026 to register their solar systems.

Eskom first presented this plan to the National Energy Regulator of South Africa (Nersa) in January 2021. Simply put, Eskom wants to significantly increase network costs, which include ...

The National Energy Regulator of South Africa (NERSA) has given Eskom the green light to begin operating solar power plants in conjunction with existing coal-fired and ...

Eskom has warned that homeowners and businesses that have installed rooftop solar systems should register them or face penalties, and South Africans could be looking at paying well over R50,000...

Regulations vs. Renewable Energy Goals: While South Africa promotes renewable energy adoption, Eskom's restrictions create barriers rather than incentives, raising concerns ...

A qualified solar installer/engineer can provide proper further guidance and advice. Tariff charges will not apply, but there may be costs incurred for the grid connection. Any export of energy will constitute a breach of the Eskom ...

Eskom on Tuesday reaffirmed its commitment to easing the transition to solar energy by extending its zero-registration fee policy for its customers. According to the power ...

Eskom prices. Since the start of the energy crisis in 2007 until 2022, electricity prices have increased by 653% as Eskom has tried to increase revenue to address its heavy debt burden while also ...
