

How much water does Eve Aqua use?

EVE Aqua is designed to work optimally with a water flow rate of approximately 600-1000 liters per hour. Adjust the water pressure accordingly to ensure efficient irrigation without any excessive force. How do I replace the batteries on EVE Aqua?

How does Eve Aqua work?

Tapping the Eve Aqua's icon in the Home app will start a water cycle, with the device shutting down automatically after the pre-set time. Remote control requires an Apple Home Hub on your home network, which is either a HomePod (Bluetooth only), HomePod Mini (Thread) or Apple TV.

How do I replace the batteries on Eve Aqua?

When it's time to replace the batteries on EVE Aqua, you can do so by unscrewing the battery compartment located on the top part of the device. Insert the new batteries following the correct polarity, and ensure that the compartment is tightly closed to maintain its waterproof feature.

Is the Eve Aqua a smart water valve?

Support for HomeKit and Thread render this water valve smarter than most, but Android users are left high and dry. The Eve Aqua is a fantastic device for irrigating your garden without wasting water, which is one of our most precious resources.

Is Eve Aqua a Thread endpoint?

Standard Thread devices typically have a wired connection to power and repeat the Thread signal, extending the network. Endpoints are often battery powered and connect to any of your Thread routers. The Eve Aqua qualifies as a Thread endpoint. It is powered by those AA batteries so it doesn't have the power capabilities to be a router.

Where are the batteries on the Eve Aqua?

A pair of AA batteries runs the Eve Aqua, located on the inside. There's no button to press, the top and bottom simply slip apart from one another. There is a column in the middle with a cover where the batteries live. It was a bit difficult to open this cover and the graphical instructions printed on the cover didn't help much.

This only helps for the device types listed in the docs, so at the moment Eve Aqua connected to Eve Extend would probably be detected but e.g. might only report on its battery ...
