

Does Eve University give a bonus to capacitor capacity?

Mindflood Booster gives a bonus to capacitor capacity. Antipharmakon Aeolis gives a bonus to capacitor capacity. EVE University members can get full reimbursement for most of these skills, among many others, through the University skillbook program. Capacitor Management - 5% bonus to capacitor capacity per skill level.

Does Eve have a Powergrid?

Every ship in EVE has an internal generator, which provides the "powergrid" you see in the fitting window. Modules fitted onto the ship connect to the powergrid and reserve a portion of the generator output for themselves, reducing the remaining powergrid when fitted.

Does the Prophecy have a cap warfare module?

The Prophecy can be effectively fitted with capacitor warfare modules in its high slots. It has a good tank, capacitor and with good drone skills a reasonable amount of dps. Brawling Hurricanes are often flown with a utility cap warfare module. The Dominix is often used as a cap warfare ship.

Do Eve University members get full reimbursement for skills?

EVE University members can get full reimbursement for most of these skills, among many others, through the University skillbook program. Capacitor Management - 5% bonus to capacitor capacity per skill level. Capacitor Systems Operation - 5% reduction in capacitor recharge time per skill level.

Can you use Ewar with a cap warfare module?

Don't mix cap warfare modules with long range modules such as ewar. The Punisher is often flown with a utility cap warfare module. Many solo fits for frigates use a small cap warfare module. Except for the Dragoon (see above), destroyers are not usually used for cap warfare. The Arbitrator is usually flown with cap warfare modules.

What happens if you run out of Mana in Eve?

Just as in many games some spells and abilities require mana, certain modules and abilities in EVE require capacitor energy. Running out of mana means that you can't cast spells for a while; in EVE, running out of capacitor means that you can't use some modules for a while.

Minmatar ships have the highest % cap recovery... and the lowest base cap. So batteries almost always give better cap/second. And it gives bonus base cap, as well as resistance to neuts (i guess that might be important) Was messing around with fitting trying to make my navy stabber more cap stable for mission grinding and i noticed how much more ...

It says "Capacitor Warfare Resistance Bonus = 25%" in Pyfa and "Increases capacitor storage. Provides defense against Energy Leech and Energy Neutralizer effects" in ...

Looks like I'm going to be using cap boosts on my latest ship (Pacifier). I haven't used cap boosters before. I know what they do and I can make sizes from 25 to 400. But I don't know how I should judge what size boosters to have with me. And don't know how many I should carry each time out. Thanks
