

Does Eve degree need to be charged?

Because it uses a replaceable CR2450 battery, the Eve Degree does not need to be charged. According to Elgato, the battery should last for a year and it costs around \$5 to replace. Eve Degree has an IPX3 water resistance rating, which means it can withstand spraying water for up to five minutes.

How long does Eve degree battery last?

According to Elgato, the battery should last for a year and it costs around \$5 to replace. Eve Degree has an IPX3 water resistance rating, which means it can withstand spraying water for up to five minutes. That means it can hold up to a little light rain, but in a downpour, it needs to go indoors.

What is Eve battery?

EVE is one of the top 10 lithium ion battery manufacturers in China. Its main business is the research and development, production and sales of consumer batteries (including lithium primary batteries, small lithium-ion batteries) and power batteries (including new energy vehicle batteries and their battery systems, energy storage batteries).

How much does the eve degree cost?

The Eve Degree is far from cheap at \$69.99, especially when a standalone temperature/humidity monitor can be purchased for less than \$10, but it has the potential to add valuable functionality to a HomeKit setup.

How accurate is Eve degree?

Eve Degree can measure temperatures between 0°F and 130°F with a +/- 0.54°F accuracy range, and between 0 to 100 percent humidity with a +/- three percent accuracy range. That's identical to the older Eve Weather and superior to the Eve Room, which can only measure 32°F to 130°F and 5 to 95 percent humidity.

Can a Eve degree measure temperature?

That means it can hold up to a little light rain, but in a downpour, it needs to go indoors. Eve Degree can measure temperatures between 0°F and 130°F with a +/- 0.54°F accuracy range, and between 0 to 100 percent humidity with a +/- three percent accuracy range.
