

Does the eve door & window run on a battery?

The battery-powered Eve Door & Window acts as a Thread endpoint (as does the Eve Aqua, which also runs on a battery), while the plugged-in Eve Energy and Nanoleaf's Thread-enabled lights are Thread routers, which can extend Thread networks by connecting multiple Thread devices together.

What is Eve door & window?

Know the status of your door or window. Unassuming and a breeze to install with no tools required, Eve Door & Window fuses cutting-edge convenience with everyday peace of mind. Your home, steadfastly smart. Eve devices rely on a rock-solid infrastructure, work across platforms, and - most importantly - honor your privacy. Cutting-edge connectivity.

How to power Eve door & window sensor?

To power the EVE Door & window sensor, it requires a single AA battery. It has a power supply input voltage of 3.6 V, ensuring efficient and reliable operation. The transmitter, which is responsible for sending the status information, has a width and depth of 18 mm, contributing to its compact design.

Does Eve door & window support thread?

The current version of Eve Door & Window supports Thread. This technology makes your smart home network more responsive, robust, and increases its reach - the only thing you need is a home hub (Thread border router). Battery-operated Thread accessories, such as Eve Eve Door & Window represent endpoints in your Thread network.

Is the eve door & window worth it?

Missing Android app aside, there's definitely a lot to like about the Eve Door and Window. Eve's contact sensor is reliable, performant, and essentially future-proof thanks to having both Thread and Matter onboard. At \$39.95 each though, automating or monitoring multiple doors and windows around your home can quickly add up.
