

What is the Federal residential solar energy credit?

o The federal residential solar energy credit is a tax credit that can be claimed on federal income taxes for a percentage of the cost of a solar photovoltaic (PV) system.² (Other types of renewable energy are also eligible for similar credits but are beyond the scope of this guidance.)

What is the federal solar tax credit?

The federal solar tax credit, formally known as the Residential Clean Energy Credit, is an incentive you can earn when installing solar panels or other clean energy equipment on your property. The tax credit equals 30% of installation costs and can reduce what you owe in federal income taxes by thousands of dollars.

How does the solar tax credit work in 2025?

In 2025, the federal solar tax credit equals 30% of solar installation costs, directly reducing your federal income tax liability. Here's an example of how the solar tax credit works: If you installed a home solar power system for \$20,000, you could claim a tax credit of \$6,000. $\$20,000 \text{ solar installation costs} \times 30\% = \$6,000 \text{ tax credit value}$

Who is eligible for a solar PV tax credit?

A tenant-stockholder at a cooperative housing corporation and members of condominiums are still eligible for the tax credit if they contribute to the costs of an eligible solar PV system. In this case, the amount you spend contributing to the cost of the solar PV system would be the amount you would use to calculate your tax credit.

Do solar panels qualify for tax credit?

Yes, you can claim the tax credit for solar installations on secondary residences. But check with your tax provider to determine if your vacation home meets the requirements to qualify. Does battery storage qualify for the federal tax credit in 2025?

What equipment is eligible for a solar tax credit?

Eligible equipment for the federal tax credit includes photovoltaic solar installations, battery storage, solar water heaters, geothermal pumps, fuel cells, and wind turbines. The 30% solar tax credit is available until 2032, before reducing to 26% in 2033, 22% in 2034, and expiring completely in 2035.
