

What is the Federal residential solar energy credit?

o The federal residential solar energy credit is a tax credit that can be claimed on federal income taxes for a percentage of the cost of a solar photovoltaic (PV) system.² (Other types of renewable energy are also eligible for similar credits but are beyond the scope of this guidance.)

Is the federal solar tax credit refundable?

In 2020 - 2021, the ITC was reduced to 26%. The Inflation Reduction Act of 2022 reinstated and renamed the program the Federal Solar Tax Credit (now known as the Clean Residential Energy Credit) and raised the credit back up to 30%. The Residential Clean Energy Credit is non-refundable.

Where can I find solar rebates & tax credits?

You can use the Database of State Incentives for Renewables & Efficiency (DSIRE) to find rebates and state tax credits available in your ZIP code. Some states have a statewide tax credit that you can apply in addition to the federal solar tax credit.

Is the federal solar tax credit back to 30%?

The federal solar tax credit is back to 30%, and there's never been a better time to install solar and start saving on energy costs. On August 16, 2022, President Biden signed the Inflation Reduction Act (IRA) of 2022 into law, immediately activating the Residential Clean Energy Credit for solar, battery storage, and more.

Does a solar rebate affect tax credit?

If the solar rebate is from a government agency, the 30% federal tax credit remains unaffected. If the rebate comes from a utility company or other non-government sources, the 30% tax credit is calculated based on the net system cost after the rebate.

Are solar rebates tax deductible?

Some states have solar rebate programs that offer cash incentives for photovoltaic installations. You can combine solar rebates with the 30% federal tax credit, but there are two important rules to keep in mind: If the solar rebate is from a government agency, the 30% federal tax credit remains unaffected.
