

What makes G-Shock MudMaster watches smart?

The G-SHOCK Mudmaster collection is loaded with features like atomic timekeeping, solar power options, and world time. Don't settle for a watch that quits before you do. These watches are as smart as they are tough.

What is a G-SHOCK Mudmaster?

A G-SHOCK Mudmaster is a rugged, mud-resistant timepiece engineered for survival. It's more than a watch; it's a tool built for extreme conditions with advanced sensors and durability.

When will the Casio G-Shock MudMaster gwg-b1000 be released?

Casio officially announced the G-Shock Mudmaster GWG-B1000 series to be released in October 2023. This is the first G-Shock with the combination of Tough Solar power, the Triple Sensor (altimeter-barometer, compass, thermometer), and Bluetooth smartphone link.

Does the MudMaster gwg-100 have environmental sensors?

The G-Shock MudMaster GWG-100 does not have any environmental sensors. Its features include shock resistance, 200-meter water resistance, mud and dust resistance, world time, 1/100 second stopwatch, countdown timer, alarm, and full auto double LED Neon Illuminator and Super Illuminator light.

What is the difference between MudMaster gsg-100 and G-Shock ggw-100?

The G-Shock Mudmaster GSG-100 series is basically the same as the Mudmaster GWG-100 series released in Japan and China, only without the Multi-Band 6 radio time syncing feature. The GSG-100 is similar in size to the Mudmaster GG-1000 Twin Sensor non-solar model and a little smaller than the original Mudmaster GWG-1000 Triple Sensor model.
