

Can I Sell my solar energy back to Georgia Power?

Customers connected to the grid with home solar systems in Georgia can sell their excess electricity back to Georgia Power for bill credits. Any excess solar energy generated in a month will carry over to the next month.

How many kW can a solar system sell to Georgia Power?

Georgia Power has a cap on the size of solar systems that can sell their electricity back to them. Residential systems are limited to 10 kW, and commercial systems are limited to 250 kW. Is Georgia Power's solar compensation the best in Georgia?

How does Georgia Power's Solar Program work?

Georgia Power's Solar Program helps maximize savings by encouraging the use of solar electricity at home. This reduces the amount of electricity sent back to the grid.

Does Georgia Power pay for excess solar power?

Georgia Power does not pay customers the full retail rate for excess solar power sent back to the grid. Instead, they compensate customers at the avoided energy rate, which is equivalent to the amount that the utility would otherwise pay to buy the power on the open market.

Who owns Georgia Power?

Georgia Power is owned by the Southern Company, which is the largest utility in Georgia. It is the only investor-owned power company in Georgia, and its prices are regulated by the Georgia Public Service Commission.
