

Does Georgia Power have a simple solar program?

Since January 2017, Georgia Power's Green Energy program has been replaced by the Simple Solar Program. This program allows customers to support and foster the growth of solar energy in Georgia by having Georgia Power purchase and retire Renewable Energy Credits (RECs) generated from solar energy resources on their behalf.

Does Georgia have a solar incentive program?

Unlike many states that give residents money or tax credits to offset the cost of solar, Georgia does not have any statewide incentive programs of this type. It's best to look to programs run by local communities or utility companies for financial help.

Does Georgia Power offer a green energy program?

Georgia Power is directed by the Commission to file a proposed Green Energy Program that would allow customers to purchase green energy at an established price. This program would not impact the bills of customers who choose not to participate.

Can I Sell my solar energy back to Georgia Power?

Customers connected to the grid with home solar systems in Georgia can sell their excess electricity back to Georgia Power for bill credits. Any excess solar energy generated in a month will carry over to the next month.

Does Georgia require solar metering?

Georgia no longer mandates full net metering for new solar customers, but some utility companies (including Georgia Power) offer a reduced benefit known as net billing. Under net billing, you'll earn some cash credit toward your energy bill when you send excess electricity from your solar panels to the grid.

Does Georgia Power offer free energy upgrades?

Georgia Power's Energy Assistance for Savings & Efficiency (EASE) program can get you free energy upgrades if your household income is 200% or less of the 2023 US Federal Poverty Guidelines. The program covers energy-efficiency projects such as:

The Georgia Solar Power Program. In Georgia specifically, using solar energy is possible. However, because it isn't quite as common in the state, fewer local incentives exist to make the switch. Georgia does not offer statewide incentives or tax credits for those who install solar panels on their homes. But there is a federal tax credit.

The Georgia Public Service Commission (PSC) allows net metering in Georgia but does not require utility companies to offer the program. Utility companies can opt into net metering and set their credit payout rate. Previously, Georgia Power offered a solar buyback program similar to net metering but capped program funding in 2021.

The bill has met strong support from the Georgia Solar Energy Industries Association (GASEIA). The bill, called the Georgia Homegrown Solar Act of 2023, would raise the state's net metering cap from 0.2% of annual ...
