

How does Georgia Power's Solar Program work?

Georgia Power's Solar Program helps maximize savings by encouraging the use of solar electricity at home. This reduces the amount of electricity sent back to the grid.

Can I Sell my solar energy back to Georgia Power?

Customers connected to the grid with home solar systems in Georgia can sell their excess electricity back to Georgia Power for bill credits. Any excess solar energy generated in a month will carry over to the next month.

How many kW is a solar system in Georgia?

Georgia Power sets the following size limits for residential and commercial solar systems: residential systems are limited to 10 kW and commercial systems to 250 kW. Georgia Power is part of the Southern Company, which is the state's largest utility.

Does Georgia Power pay for excess solar power?

Georgia Power does not pay customers the full retail rate for excess solar power sent back to the grid. Instead, they compensate customers at the avoided energy rate, which is equivalent to the amount that the utility would otherwise pay to buy the power on the open market.

How much does community solar cost in Georgia?

Customers of Georgia Power can sign up directly for community solar output by enrolling online. It costs \$24.00 per 1 kilowatt block per month to sign up. The utility's website says, "You should expect that the Community Solar charge to participate in the program may exceed any bill credits received from solar production."

Are solar panels worth it in Georgia?

Georgia lacks many statewide incentives common across the US, but abundant sunshine and the federal tax credit might make solar panels worth a closer look. Instantly estimate your solar cost and savings. Atlanta is one of the sunniest major cities in the country.
