

What is the name of the galaxy that our Solar System is part of?

Our Solar System is part of the Milky Way Galaxy, which contains hundreds of billions of stars, including our Sun. Let's look at the basics. Our Solar System consists of our star, the Sun, and its orbiting planets (including Earth), along with numerous moons, asteroids, comet material, rocks, and dust.

What does the Milky Way Galaxy contain?

Our Milky Way Galaxy contains billions of stars, including our Sun. Our Sun, in turn, has planets orbiting it, including our Earth. Our Milky Way Galaxy is one among the billions of galaxies in our Universe.

How many stars are in the Milky Way galaxy?

On that scale with our Solar System in your hand, the Milky Way Galaxy has 200 - 400 billion stars. It would span North America (see the illustration on the right).

What type of galaxy is the Milky Way?

The Milky Way is a flattened disk with spiral arms. This disk contains dust, stars, and gas rotating from a center point. According to the Hubble Galaxy classification scheme, the Milky Way is an SBc barred spiral galaxy. This means that it's partway between SBb and SBc. Who are our neighboring galaxies?

Which galaxy is the closest to the Milky Way?

The Andromeda galaxy is the closest galaxy to the Milky Way. It is about two million light-years away. All the stars and planets you can see are part of the Milky Way galaxy, but only one in three people in the United States can see the Milky Way band with the naked eye due to city lights.

What are the basic components of the Solar System?

Our Solar System is made up of our star, the Sun, and its orbiting planets (including Earth), along with numerous moons, asteroids, comet material, rocks, and dust. Let's look at the basics. Our Sun is just one star among the hundreds of billions of stars in our Milky Way Galaxy.

The Crossword Solver found 30 answers to "____ way, the galaxy that contains our solar system (5)" 5 letters crossword clue. The Crossword Solver finds answers to classic crosswords and ...

Our Solar System is about 25,000 light years away from the center of our galaxy - we live in the suburbs of our galaxy. Just as the Earth goes around the Sun, the Sun goes around the center of the Milky Way. It takes ...
