

Ge ev electric car charger level-2 charging station

Where can I buy a GE WattStation Level 2 charger?

Shop GE WattStation Level 2 30 Amps/240-volt EV Electric Vehicle Charging Station with 20-ft Cable at Lowe's.com. Once you've traded a gas pump for a plug, this GE WattStation level 2 charger is exactly what you need to keep your vehicle fully charged.

Does GE have a Level 2 public charging station?

In order to grow its range of residential charging stations, the corporate giant from the United States decided to develop a network of level 2 public charging stations. The GE WattStation is equipped with a solid SAE J1772 connector. GE also offers charging station solutions for residential and commercial projects.

What is a Level 2 electric car charger?

For starters, level 2 AC occurs on the electric vehicle onboard charger, which means a Level 2 charger is a simple charger compared to a Level 3 charger, which includes an onboard charger in the charger itself that converts AC to DC. It's able to transfer the DC directly to the vehicle's battery, as shown in the infographic image below:

How much does Level 2 EV charging cost?

In California, for instance, charging at a public Level 2 station typically costs around 30 cents per kWh, whereas utilizing a Level 3 charger can cost up to 40 cents per kWh, as illustrated in the accompanying bar graph. So, you've embarked on the exciting journey of Level 2 EV charging, and maybe a few questions have popped up along the way.

Why is a Level 2 EV charger better than other EV charging levels?

The main reason why Level 2 charger installations exceed other EV charging Levels is that Level 2 chargers can be installed practically everywhere. Level 2 EV charging speeds of 10-60 miles per hour also align perfectly with Americans driving an average of 37 miles daily, according to Department of Transportation statistics.

Why should you consider buying a GE EV charger?

GE is helping to lead the creation of the 'end-to-end' charging infrastructure for electric vehicles by making it easier to purchase its state-of-the-art EV charger.

EV Level 2 Charging Time: Depending on your battery size and power, a Level 2 charger can fully charge your EV in 2-8 hours, much faster than Level 1's 11-20 hours. EV Level 2 Charging Installation and Use. EV Level 2 ...
