

What is a Generac home standby generator?

A Generac home standby generator is a device that provides backup power to your home during an outage. Available in sizes up to 26 kW, it offers virtually endless backup capabilities, giving you peace of mind. When integrated with a battery system like PWRcell, the generator will automatically kick on to power the home during an outage when battery levels get low, giving the battery time to recharge and eventually switch back.

*Subject to fuel availability.

What is a Generac PWRcell?

The Generac PWRcell is a whole-home solar battery backup system. It is a product from Generac, a trusted American company known for its backup generators. The power output and energy storage capacity can be customized to meet the needs of many different kinds of homeowners.

Does Generac endorse PWRcell for off-grid solar?

Despite designing for integration with its generators to extend the backup capabilities of the PWRcell, Generac does not officially endorse the use of PWRcell in off-grid solar setups. The tradeoffs here are a somewhat higher price than the batteries from Tesla and LG, and the missing end-of-warranty capacity guarantee.

How does a Generac PWRcell inverter work?

The Generac PWRcell inverter is designed to operate a home in grid-connected or "islanding" mode in case the grid goes down. It can be set by the homeowner to one of several modes, including backup power, self-supply, time-of-use, and zero-export.

What can Generac PWRcell batteries power during an outage?

In the event of a grid outage, Generac PWRcell batteries can power nearly their entire home. Using these components, homeowners can run nearly their entire home on a single backup battery, making the Generac PWRcell one of the most exciting home batteries on the market.

Are Generac PWRcell batteries a good choice?

The Generac PWRcell is one of the most exciting home batteries on the market. It allows homeowners to run nearly their entire home on a single backup battery in the event of a grid outage, which many other companies' batteries cannot provide.

A popular 16,000 or 16kW whole house generator from Generac will put you back about \$4,200 (plus installation, which will cost several thousand dollars at a minimum). Here is a popular 16kW whole house generator from ...
