

Does Georgetown own a solar farm?

Georgetown doesn't own the farm, but its agreement allowed the owners to get the financing to build it. This spring, Georgetown is adding power from a 154-megawatt solar farm being built by NRG Energy in Fort Stockton, 340 miles to the west of the city.

Is Georgetown a renewable city?

Georgetown's town square is dominated by 19th- and 20th-century storefronts, but the electric lights are powered by renewable energy. Drew Anthony Smith With Georgetown emerging as a brave new model for a renewable city, it makes sense to ask if others can achieve the same magical balance of more power, less pollution and lower costs.

How did Georgetown get its power from a wind farm?

In 2016, the city bought its way out of a contract providing energy derived from fossil fuels and arranged to get its power from a 97-unit windfarm in Adrian, Texas, about 500 miles away in the Texas Panhandle. Georgetown doesn't own the farm, but its agreement allowed the owners to get the financing to build it.
