

Should the Georgia Power buyback rate be set at the cost?

Many advocated for the buyback rate -- the rate that Georgia Power buys excess electricity -- to be set at the rate the utility charges customers to make the program more attractive. Others called for an expansion or extension of the pilot program from a few years ago where Georgia Power bought electricity at the Solar Avoided Energy cost rate.

Does Georgia Power have a solar buy back program?

Georgia Power's Solar Buy Back program offers credits for the solar electricity sent back to the grid. The best way to maximize your solar savings is to use as much of your solar electricity at home when it's produced. The credits are the same regardless of the residential rate plan that you are enrolled with.

Can Georgia Power buy back electricity?

Dr. Marilyn Brown, Regents Professor at the Georgia Institute of Technology, is a champion of solar and net metering in Georgia. She acknowledged Georgia Power will be able to buy back electricity fairly cheaply from homeowners, but also recognized the agreed rate was not as bad as it could have been.

Does Georgia Power have a simple solar program?

Since January 2017, Georgia Power's Green Energy program has been replaced by the Simple Solar Program. This program allows customers to support and foster the growth of solar energy in Georgia by having Georgia Power purchase and retire Renewable Energy Credits (RECs) generated from solar energy resources on their behalf.

How much does a solar buyback cost in Georgia?

The current buyback rate for solar customers is 2.26 cents per kWh. That looks to receive a bump up with the Public Service Commission and Georgia Power settling at 6.68 cents per kWh for a buyback rate in the new case.

Can I Sell my solar energy back to Georgia Power?
