

What is Georgia Power's Advanced Solar Initiative (ASI)?

Georgia Power's Advanced Solar Initiative (ASI) is a program initiated in 2012 to procure up to 210 Megawatts (MW) of renewable resources through a combination of Utility Scale and Distributed Generation (DG) Request For Proposals (RFPs) and application processes.

Does Georgia Power have a simple solar program?

Since January 2017, Georgia Power's Green Energy program has been replaced by the Simple Solar Program. This program allows customers to support and foster the growth of solar energy in Georgia by having Georgia Power purchase and retire Renewable Energy Credits (RECs) generated from solar energy resources on their behalf.

What is Georgia Power's community solar program?

Georgia Power's Community Solar program gives you the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar facilities. You then receive energy credits on your monthly bill based on the solar facility's production.

What is the Georgia Solar Energy Association?

The Georgia Solar Energy Association (GA Solar) is Georgia's oldest and largest organization devoted exclusively to the benefits of solar energy for individuals, businesses, and communities statewide. It offers resources, information, and opportunities. Join GA Solar Today!

Does Georgia Power offer a green energy program?

Georgia Power is directed by the Commission to file a proposed Green Energy Program that would allow customers to purchase green energy at an established price. This program would not impact the bills of customers who choose not to participate.

Does Georgia Power offer incentives for solar?

Georgia Power does not offer incentives specifically for solar installations. However, they do offer rebates and incentives for energy efficient appliances such as clothes washers, water heaters, lighting fixtures, and programmable thermostats. A list of these items can be found [here](#).
