

Does Georgia Power have a simple solar program?

Since January 2017, Georgia Power's Green Energy program has been replaced by the Simple Solar Program. This program allows customers to support and foster the growth of solar energy in Georgia by having Georgia Power purchase and retire Renewable Energy Credits (RECs) generated from solar energy resources on their behalf.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Does Georgia offer solar incentives?

Georgia's sunny skies, mild winters, and high natural gas prices make it a natural fit for an all-electric home. While Georgia doesn't offer many state-level solar incentives for homeowners, federal tax credits can still take a big bite out of the upfront costs. See how much solar costs in Georgia. What are the best solar incentives in Georgia?

How much does a 5 kW solar panel cost in Georgia?

In Georgia, the average cost for a 5 kW solar panel system is around \$13,160. Once you factor in the 30% credit, the cost of a solar panel system in Georgia comes down to \$9,212. When you file your taxes, you can claim this incentive as a credit towards your federal tax bill.

Can you get free solar panels in Georgia?

Unfortunately, you can't get free solar panels in Georgia, though incentives can dramatically lower the price you pay. If you've seen advertisements for free solar panels or no-cost solar programs, they're probably referring to solar leases or PPAs.

How much does a solar system cost in Georgia?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC. In Georgia, the average cost for a 5 kW solar panel system is around \$13,160.
