

What is the best solar incentive in Georgia?

The best solar incentive in Georgia is actually a federal tax credit. The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC.

How much does a solar system tax credit cost in Georgia?

Given the average solar system cost of \$36,190 in Georgia, the 30% credit usually comes out to \$10,857. You can save that much on your tax bill if you owe enough to cover the credit, which can effectively bring down the cost of your system. Any unused credit can be rolled over to four additional tax years for a total of five years.

Are solar panels tax deductible in Georgia?

Georgia doesn't offer any state-specific battery incentives. However, all batteries larger than 3 kWh are eligible for the same 30% federal tax credit as solar panels. Batteries can make good financial sense as part of a home solar system in Georgia.
